Sequence 2, Application US/09949474A

Patent No. 676231

GENERAL INFORMATION:
APPLICANT: Manoharan, Muthiah
APPLICANT: Guzaev, Andrei P.
TITLE OF INVENTION: Process for Preparing Peptide Derivatized Oligomeric Compounds
FILE REFERENCE: ISIS4850
CURRENT APPLICATION NUMBER: US/09/949,474A

CURRENT APPLICATION NUMBER: 09/658,517
PRIOR FILING DATE: 2000-09-08
NUMBER OF SEQ ID NOS: 24
SEQ ID NO 2

Patent No. 6337192

GENERAL INFORMATION:

APPLICANT: Bartel, Paul L.

APPLICANT: Tavtiglan, Sean V.

TITLE OF INVENTION: MMSC1 - An MMAC1 Interacting Protein

TITLE OF INVENTION: MMSC1 - An WAC1

CURRENT PLICATION NUMBER: US/09/233,086

CURRENT FILING DATE: 1999-01-19

EARLIER APPLICATION NUMBER: US 60/071,861

EARLIER PLING DATE: 1999-01-20

NUMBER OF SEQ ID NOS: 65

SOFTWARE: Patentin Ver. 2.0

SEQ ID NO 61

LENGTH: 21

                                                                                                                                                                                                                                                                                                                                                                                                                                   US-09-018-584A-80/c

Sequence 80, Application US/09018584A

Patent No. 628863

GENERAL INFORMATION:

APPLICANT: Schumm, James W.

TITLE OF INVENTION: MATERALS AND METHODS FOR

TITLE OF INVENTION: IDENTIFYING AND ANALYZING INTERMEDIATE TANDEM

TITLE OF INVENTION: REPEAT DNA MARKERS

TITLE OF SEQUENCES: 147
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö
                                                                                                                                                                                                                                                                                  ö
